Members of Division 320 RE: Switch Lining Proficiency Tests

Brothers and Sisters,

We have been advised by Local Management that they will be placing eggs in switch points to perform proficiency testing.

Please ensure that you are checking ALL switch points BEFORE attempting to line a switch!

If you find an egg, please report it immediately to the tower. Use a broom or other tool to remove the egg. Do not put your hands in the switch points.

Thank you,

Your Local Chairs
